### Main narratives:

### Overview:

The majority of content was related to COVID-19 and the possibility of new vaccines. The main narrative concerned the claims of COVID-19 being a source of government oppression through mandatory vaccines which also doubles as corruption as too much funding is going to buying COVID-19 vaccines. Additionally, the war in Ukraine was also referenced with the main narratives being related to corruption and mismanagement of financial resources. From the two most prominent topics, content relating to COVID-19 gained more overall engagement hence resulting in more COVID-19-related content creation.
